PROGETTO X²

The Progetto X² Air seat pad is used with its ventilated skin-care layer to keep you cool. Its two-layer design and multi-density padding ensures excellent comfort no matter how long your epic ride is.

1. SKIN CARE LAYER

A four-way stretch, microdenier, seamless, bacteriostatic layer made to adapt to the shape of your body and saddle without any folds in the fabric. Air flows right into the surface fabric to aid evaporation.

2. SEAMLESS INTEGRATED TECHNOLOGY CUSHIONING LAYER

Multi-density foam with infinitely variable thickness. The thickness of the pad is engineered to place the padding where you need it most for maximum comfort.

3. VISCOUS COMFORT INSERTS

Perforated viscous padding is added under the highly sensitive ischial and perineum pressure areas.

KISS^{AIR}

The New improved KISS Air seat pad aims to incorporate as many of the features and comfort as our top-of-the-line Progetto X² Air seat pad but at a more affordable price.

1. SEAMLESS SKIN CARE LAYER

A super soft, brushed microfiber top that maximizes comfort and fit. Seamlessly engineered to eliminate chafing and abrasion. Flexible to move with you. Bacteriostatic treatment to avoid saddle sores and infection.

3. ANATOMICAL SHAPE

Comfort is further enhanced by creating a perfect interface to your body during every pedal stroke.

2. DUAL DENSITY, INFINITELY VARIABLE THICKNESS

Dual density and infinitely variable thickness gives you the perfect cushioning for every part of the pad. Maximum thickness and density in the ischial zone, tapering to moderate thickness in the perineum, and minimum thickness at the perimeter.

At Castelli, we obsessively test and refine to give you the best fitting, highest performance cycling apparel.

1 On the bike, your Castelli jersey should fit close to the skin.

2 Off the bike, your Castelli jersey might feel tight across the chest and a little short in front.

3 Castelli 3D mesh and ProseccoStrada treatment helps perspiration evaporate quickly to keep you cooler and drier.

4 Castelli jerseys are designed with the sleeves articulated forward for maximum aerodynamic performance.

5 Bibshorts should fit tightly enough to support critical leg muscles through compression without inhibiting movement and constricting blood flow.
